Career Objective

Computer Science undergraduate specializing in AI ML with expertise in Java, Spring Boot, Machine Learning, and Artificial Intelligence. Passionate about developing scalable software solutions and applying AI-driven technologies to solve real-world problems. Seeking opportunities to contribute, learn, and grow in a technology-driven environment.

Education

Anil Neerukonda Institute of Technology and Sciences (ANITS)

2023 – 2027

B.Tech in Computer Science (AI & ML) *CGPA: 9.23*

Visakhapatnam, Andhra Pradesh

Technical Skills

- **Programming Languages:** Java, Python
- **Frameworks & Libraries:** Spring Boot, Spring Security, Scikit-learn, Pandas, NumPy, Matplotlib
- **Databases:** PostgreSQL, MySQL, MongoDB, H2
- **Core Concepts:** Data Structures & Algorithms, REST APIs, OOPs, DBMS, OS, CN, Machine Learning, Deep Learning, Prompt Engineering

Internships

SOC Analyst Intern

May 2025 – June 2025

Cyberthreya — Virtual Internship

Gained practical exposure to network security, SIEM tools, log monitoring, and incident response workflows.

- Worked on cybersecurity monitoring and threat analysis concepts
- Strengthened analytical and problem-solving skills through practical security scenarios

Projects

ANITS ResultsHub — Web Development [\[GitHub\]](#)

Sept 2025 – Present

- **Tech Stack:** Java, Spring Boot, Spring Security, PostgreSQL, JWT Authentication, Firebase Studio
- Designed and developed RESTful APIs using Spring Boot for student result management, implementing JWT Authentication and role-based access control for students, faculty, and administrators.
- Built a secure backend architecture using Spring Security and PostgreSQL, supporting role-specific access and efficient data management.
- Developed academic analytics modules to visualize pass/fail statistics and performance insights, enabling better monitoring of student outcomes.

TracSpend — Personal Finance Management Mobile App [\[GitHub\]](#) — [\[Live\]](#)

Feb 2025 – Present

A multi-currency personal finance application for budgeting, expense tracking, and spending analytics.

- Implemented budgeting and expense tracking with offline data support
- Added analytics features for monitoring spending patterns and financial trends

Breast Cancer Prediction System — Machine Learning [\[Live\]](#)

Jan 2026

- Developed a machine learning model to classify breast cancer cases as benign or malignant using medical data.
- Utilized Balanced Random Forest to address class imbalance and improve recall, reducing the risk of false negatives in medical diagnosis.
- Contributed to testing, optimization, and workflow enhancements for better accuracy

Achievements

- Solved **500+ problems** on LeetCode, strengthening algorithmic thinking and coding proficiency
- Secured **2nd place** among 400+ participants in the ML Vibe Coding Hackathon conducted by ANITS
- Achieved **Elite + Top 5%** certification in NPTEL Data Analytics
- Completed **NPTEL Java DSA Certification** with Elite status
